Education

Milestone International Secondary School <i>Higher Secondary</i>	2016 - 2018
Tribhuvan University, IOE, Pulchowk Campus <i>Bachelor in Electronics, Communication & Information Engineering</i>	2018 - 2023

Work Experience

TAI Inc. <i>Python Intern</i>	Nov 2023 – Feb 2024 <i>on-site</i>
• Made Text Summarization in Nepali using BART • Researched about PEFT Model and integrated LoRA to finetune the BART Model • Learned about Docker, Jenkins, Neo4j	
TAI Inc. <i>ML Trainee</i>	Feb 2024 – Present <i>on-site</i>
• Working as ML engineer in Research and Development • Research and implementation of Graph RAG • Research on LoRA and its advance forms along with its implementation • Research on different techniques to extend the context length on pretrained LLM • Got opportunities to work along with Japanese tech company and senior ML engineer from TAI, I learned real word software development and learned about scalability.	

Projects

Text Summarization in Neapli using BART	
• A project done in completion for Internship program at TAI Inc. • Capable of generating abstract summarization for Nepali text • Experimented with LoRA for finetuning in resource constraint environment • Finetuning encoder-decoder architecture for NLU and NLG task of abstractive summary generation	
Automatic Music Generation	
• A project done in completion for Major Project in Bachelor. • Capable of generating music from different instruments. • Experimented with combining tone-matrix music with generated music by model	
Music Genre Recognition using Deep Learning	<u>Source Code</u>
• A project done in completion for Minor Project in Bachelor. • Use the CNN architecture used for Music Genre recognition • Experimented with combining tone-matrix music with generated music by model	
Finetuning LLM with different form of LoRA	<u>Source Code</u>
• Supervised Finetuning of Phi-3 using different LoRA techniques.	

Technical Skills

Languages: Python, Java, C++, JavaScript
AI tools: Lang chain, pyTorch, HuggingFace, Tensorflow
Domain Knowledge: NLP, LLMs, PEFT techniques, LoRA, GraphRAG
Backend: Django, Streamlit, Flask
Developer Tools: Git, Docker
